| Brainstorm Individually  | 26         |
| Monitor the Group's Dynamics                                       | 27         |
| Avoid Groupthink   | 28         |
| Take Time to Pause and Reflect                                     | 29         |
| <b>Conclusion</b>  | <b>29</b>  |

## **3 Theories, Predictions, and the Literature** **31**

---

- Theories Are Clear and Concise Explanations** 32
- Initially, Keep Your Idea Abstract** 33
- The Pitfalls of “the Literature”** 35
- The Nuts and Bolts of a Successful Literature Search** 36
  - Using Databases Such as PsycINFO 36
  - Beginning the Search 38
  - Knowing When (and How) to Be Strategic 39
  - Utilizing the Team to Identify Themes 40
- From Theory to Prediction** 42
  - Testability of the Prediction 43
  - Characteristics of Strong Hypotheses 43
  - Utility of the Data 45
- Conclusion** 45

## **4 Ethics** **47**

---

- The Goals and Ethics of Science** 48
- The Formation of Ethics Committees** 50
- Research Is Not Reality TV . . . or Is It?** 52
- Protecting Research Participants** 54
  - Informed Consent 55
  - Weighing Risks and Benefits 55
  - The Ability to Withdraw Without Penalty 58
  - The Debriefing and the Use of Deception 59
  - Two Types of Harm 60
- The Nuts and Bolts of an IRB Application** 61
- Ethics in Action** 63
- Conclusion** 67

## **5 Experimental Design** **69**

---

- Designing Your Study** 72
  - Lesson 1: Avoid Complexity 72
  - Lesson 2: Utilize the Design Team 74
- Translating Your Plan Into an Elegant Methodology** 75
  - Experimental Control 76
  - Randomization and Counterbalancing 77
- Selecting Measures** 77
  - Coding Participant Behavior 78
  - Utilizing Existing Measures 79

|  |           |
|--|-----------|
| Creating Your Own Measures             | 80        |
| An Application of Measurement Concepts | 81        |
| <b>Investigating Moderators</b>        | <b>84</b> |
| <b>Conclusion</b>                      | <b>86</b> |

## **6 Statistics and Data** **89**

---

|   |            |
|---|------------|
| <b>Beginner's Mind</b>                              | <b>91</b>  |
| <b>First of All, Don't Panic!</b>                   | <b>91</b>  |
| <b>Statistics as "Principled Argument"</b>          | <b>94</b>  |
| <b>The Basics: Statistics' Three Sacred Tools</b>   | <b>95</b>  |
| The Mean  | 95         |
| Standard Deviation                                  | 97         |
| Standard Error                                      | 99         |
| <b>Putting These Tools Together</b>                 | <b>101</b> |
| <b>Advanced Statistics: A Matter of Correlation</b> | <b>103</b> |
| The General Linear Model                            | 104        |
| Statistical Mediation and Partial Correlation       | 104        |
| <b>Statistics and Experimental Design</b>           | <b>106</b> |
| <b>Working With Data</b>                            | <b>108</b> |
| <b>Conclusion</b>                                   | <b>110</b> |

## **7 Piloting a Study** **113**

---

|   |            |
|---|------------|
| <b>What Is a Pilot Study?</b>           | <b>115</b> |
| Testing Research Materials              | 115        |
| <i>The Experimental Manipulation</i>    | <i>115</i> |
| <i>The Outcome Measures</i>             | <i>118</i> |
| Identifying Logistical Problems         | 118        |
| Training Experimenters                  | 119        |
| <b>Conducting a Careful Pilot Study</b> | <b>121</b> |
| Location                                | 122        |
| Compensation                            | 122        |
| The Script and the Extended Debriefing  | 122        |
| <b>Using Piloting Feedback</b>          | <b>123</b> |
| <b>Learning From Experience</b>         | <b>126</b> |
| <b>Conclusion</b>                       | <b>126</b> |

## **8 Conducting a Study** **129**

---

|  |            |
|--|------------|
| <b>Avoiding Threats to Internal Validity</b> | <b>131</b> |
| Be Organized                                 | 131        |
| Minimize Differences Among Experimenters     | 132        |

|  |            |
|--|------------|
| Minimize Demand Characteristics                    | 132        |
| Distribute Participants Across Experimenters       | 133        |
| Control the Experimental Environment               | 133        |
| <b>Primer on Running Participants</b>              | <b>134</b> |
| Prepare and Stick to a Script                      | 134        |
| Memorize Your Opening and Closing                  | 136        |
| Be Polite and Professional                         | 136        |
| Appear Confident and Competent                     | 137        |
| Arrive Early                                       | 137        |
| Wear a “Lab Coat”                                  | 137        |
| Expect Delays and No-Shows                         | 138        |
| Expect the Occasional Snafu                        | 138        |
| Document, Document, Document                       | 139        |
| Reveal Any Deception With Compassion               | 140        |
| <b>Participant Recruitment</b>                     | <b>140</b> |
| Challenges Associated With Participant Recruitment | 140        |
| Convenience Sampling                               | 141        |
| Participant Compensation and Scheduling            | 141        |
| <b>Studies Conducted “in the Field” or Online</b>  | <b>142</b> |
| Challenges Associated With Field Studies           | 143        |
| Online Studies                                     | 144        |
| <b>Coordinating Your Team’s Efforts</b>            | <b>146</b> |
| <b>Conclusion</b>                                  | <b>148</b> |

## 9 Presentations

151

|   |            |
|---|------------|
| <b>The Pitfalls in Presenting</b>                           | <b>155</b> |
| <b>Principles of Good Presentations</b>                     | <b>156</b> |
| <b>Organizing Your Presentation</b>                         | <b>157</b> |
| Provide a Compelling Context                                | 158        |
| Shape the Context Into a Hypothesis                         | 159        |
| Describe Your Methods Vividly                               | 160        |
| Tell a Clear and Concise Story With Your Data               | 163        |
| Choose Visual Depictions of Data That Enhance Understanding | 163        |
| Leave the Listener Satisfied, but Craving More              | 165        |
| The Reality of Null Results                                 | 166        |
| <b>The Nuts and Bolts of Presenting Your Research</b>       | <b>166</b> |
| Creating and Delivering an Effective Research Talk          | 167        |
| <i>Structuring Your Presentation</i>                        | <i>168</i> |
| <i>Using PowerPoint</i>                                     | <i>168</i> |
| <i>Using Presenter Notes</i>                                | <i>170</i> |
| <i>Presentational Style</i>                                 | <i>172</i> |

|   |     |
|---|-----|
| Refining Talks Through Practice                 | 173 |
| <i>Editing as a Team</i>                        | 173 |
| <i>Practice, Practice, Practice</i>             | 174 |
| Creating an Effective Poster Presentation       | 174 |
| <i>Step 1: Writing Up the Text</i>              | 176 |
| <i>Step 2: Selecting the Graphs and Visuals</i> | 177 |
| <i>Step 3: Formatting the Poster</i>            | 177 |
| <i>Step 4: Printing the Poster</i>              | 179 |
| <i>Step 5: Preparing Handouts</i>               | 179 |
| <i>Step 6: Practice!</i>                        | 179 |
