Preface xvi
Acknowledgments xviii
About the Author xix

Introduction, Overview, and Perspectives 1

Program Evaluation and the Contribution of This Textbook 2
Organizational Settings 4
Program, Policy, and Practice Change 4
Perspectives on Program, Policy, and
Practice Change Within Organizational Settings 5
Principle 1: Uptake of program, policy, and practice change within organizational settings takes place in iterative phases over time, with different influences at differing phases. 5
Principle 2: The change process is "messy" due to the inherent complexity within organizational systems. 9
Introducing Lifestyle Education for Activity Program (LEAP) 12
Implementation Monitoring
Process Presented in This Textbook 14
Organization of the Textbook 16
▶ Key Points for Introduction, Overview, and Perspectives 17

Phase I. Basic Program Planning 19

Step 1. Conduct Preimplementation Planning 21

An Overview of the Basic Program
Planning and Evaluation Planning Process 23
Overview of Program Planning Process 23
Overview of Evaluation Planning Process 25
Important Considerations for Enhancing the Effectiveness of the Program Planning and Evaluation Planning Process 26
Effective program, policy, or practice change entails extensive collaboration with people from the implementing settings. 27
Identifying Stakeholders 28
Working Relationships 29
LEAP Case Illustration 33
Intervention planning is optimally guided by a conceptual framework. 33
LEAP Case Illustration 35

Program planning, implementation, and evaluation
are best conducted within collaborative interdisciplinary teams. 36
▶ Key Points for Preimplementation Planning 38

Phase II. Implementation Planning 39

Step 2. Describe the Program, Policy, or Practice, Organizational Setting, and Broader Context 41

Describe the program, policy, or
practice that is to be implemented. 41
Setting/Scope of Study 42
Purpose 42
Change Model 42
Program, Policy, or Practice Description 42
Intervention Implementation Approach 43
Conceptualization of the Innovation 43
Timing and Degree of Change Agent and Stakeholder Involvement 44
Delivery/Installation of the Program, Policy, or Practice 45
LEAP Case Illustration 46
Portray the organization in which the
program, policy, or practice will be implemented. 47
Mission and Characteristics 50
Structures and Processes 50
Resources and Resource Flexibility 52
Populations Served 52
LEAP Case Illustration 53
Define the broader context of the organization
in which the program, policy,
or practice will be implemented. 53
LEAP Case Illustration 56
Where to Begin? 56
▶ Your Turn: Product and Process Orientations 59
▶ Key Points for Describing the Program, Policy, or
Practice, Organizational Setting, and the Broader Context 59

Step 3. Determine Strategies for Facilitating Adoption of the Program, Policy, or Practice at the Organizational Level 61

Describe the steps needed to facilitate
organizational adoption of a program, policy, or practice. 62
Determine how adoption decisions are made within the organization. 62
Identify likely influences on the adoption decision-making
process within the setting, and select appropriate strategies. 63

Do not copy, post, or distribute

This work may not be reproduced or distributed in any form or by any means without express written permission of the publisher.

Factors Over Which the Planning Team Has Control 65
Factors That Can Be Influenced 66
Factors Less Amenable to Change 66
Develop a plan detailing strategies for facilitating organizational adoption of a new program, policy, or practice. 68
LEAP Case Illustration 68
▶ Your Turn: Perspectives of Organizational Decision Makers 74
▶ Key Points for Facilitating Program, Policy, and Practice Adoption 74

Step 4. Establish Complete and Acceptable Delivery/Installation of the Program, Policy, or Practice 77

Describe the components of complete and acceptable delivery/installation in implementation monitoring. 78
Completeness or Dose Delivered 78
Individual Level 78
Environmental Level 78
Fidelity 79
Individual Level 79
Environmental Level 79
Reach 79
Individual Level 80
Environmental Level 80
Dose Received 80
Individual Level 81
Environmental Level 81
Identify the crucial components of the program, policy, or practice (completeness). 81
Define program, policy, or practice delivery or installation that is consistent with its conceptual underpinnings (fidelity). 84
Identify who the program, policy, or practice should reach to have the desired level of impacts/outcomes (reach). 86
Define the extent to which participants should engage with, interact with, be receptive to, and/or use materials and recommended resources (dose received). 87
Where to Begin? 88
LEAP Case Illustration 88
▶ Your Turn: Defining Completeness, Fidelity, and Reach 91
▶ Key Points for Describing Complete and Acceptable Delivery of a Program, Policy, or Practice 92

Step 5. Develop Strategies for Facilitating Program, Policy, or Practice Implementation and Sustainability 95

List the steps needed to facilitate program, policy, or practice implementation. 96
- Steps to Facilitate Implementation 96
- Influences on Program, Policy, and Practice Implementation and Suggested Strategies 97
  - Characteristics of Program, Policy, or Practice 98
  - Implementation Approach/Process 98
  - Leadership and Support and Resources 99
  - Characteristics of Implementers and Features of the Organization 102
  - External Factors 104

Develop a plan to facilitate implementation of a specific program, policy, or practice in an organizational setting. 104
- LEAP Case Illustration 104

List the steps needed to facilitate program, policy, or practice sustainability. 112
- Steps to Facilitate Sustainability 112
- Influences on Program, Policy, and Practice Sustainability and Suggested Strategies 113
  - Implementation Process and Leadership and Support 114
  - Organizational Characteristics and Resources 114
  - LEAP Case Illustration 114

Develop a plan to facilitate sustainability of a specific program, policy, or practice in an organizational setting. 117
- ▶ Your Turn: Planning for Sustainability 119
- ▶ Key Points for Facilitating Implementation and Sustainability 120

Step 6. Develop or Update the Action Model, Action Plan, and Logic Model to Integrate Planning 123

Develop the action model. 124
- Implementing Organization 126
- Intervention Protocol 126
- Implementers, Community Partners, and Service Delivery Protocol 126
- Ecological Context 127
  - LEAP Case Illustration 127

Draft an initial action plan. 127

Develop or update a logic model that incorporates change and action model elements. 130
- Selecting a Logic Model Template 132
- Sample Logic Model Templates 133

Do not copy, post, or distribute

Summary 140
- Your Turn: Logic Models 141
- Key Points for Integrating Planning 141

Phase III. Implementation Monitoring Planning 143

Step 7. Develop Initial Implementation Monitoring Questions 145

Articulate the general purposes for conducting implementation monitoring for a specific program, policy, or practice change. 145
LEAP Case Illustration 147

Select components of the implementation monitoring plan and draft implementation monitoring questions. 149
LEAP Case Illustration 153

Organize implementation monitoring plan questions according to the logic model. 153
LEAP Case Illustration 155
- Your Turn: Ethics of Excessive Data Collection 158
- Key Points for Developing Implementation Monitoring Questions 158

Step 8. Choose Implementation Monitoring Methods and Compile the Comprehensive Implementation Monitoring Plan 161

Consider options for implementation monitoring design and methods. 161
Qualitative and Quantitative Methods 161
Methods and Design Elements for Implementation Monitoring 163
Data Sources 163
Sampling 166
Design 167
Data Collection Tools 169
Data Collection Procedures 171
Criteria for Evidence of Implementation 171
Data Management 173
Data Analysis/Synthesis 173

Select multiple implementation monitoring methods for each implementation monitoring question. 174
Data Collection Tools 175
LEAP Case Illustration 176
Criteria for Evidence of Implementation 176
LEAP Case Illustration 176
Single Data Collection Tool 178

Multiple Data Collection Tools 178
Multiple Essential Elements 178
Compile the comprehensive implementation monitoring plan. 181
LEAP Case Illustration 182
Organize the implementation monitoring plan using a logic model. 182
LEAP Case Illustration 182
▶ Your Turn: Qualitative and Quantitative Methods 188
▶ Key Points for Choosing Implementation Monitoring Methods 188

PHASE IV. IMPLEMENTATION 189

Step 9. Implement the Program, Policy, or Practice and Use Implementation Data for Formative Purposes 191

Apply concepts from implementation frameworks to understand implementation. 191
Understand the innovation and implementation from the perspective of setting stakeholders. 196
Review Implementation Cases: When Things Don't Go as Planned 196
Active Winners 198
Workplace Intervention 199
Quit Together 200
Be able to discuss practical issues for using implementation data in a formative manner. 203
Develop a plan for using implementation monitoring data in a formative manner to keep a project on track. 209
▶ Your Turn: Formative Use of Implementation Monitoring Data 210
▶ Key Points for Implementation and Using Data for Formative Purposes 211

Step 10. Collect and Manage Implementation Data 213

List and define important steps and principles of data management. 214
1. Develop data management plan. 215
2. Collect data in the field. 215
3. Transfer data from field to data entry. 217
4. Ensure secure data storage. 217
5. Develop procedures for access to data. 217
6. Conduct data entry. 218
7. Clean data. 218

Do not copy, post, or distribute

This work may not be reproduced or distributed in any form or by any means without express written permission of the publisher.

8. Conduct preliminary data processing. 219
9. Conduct data analysis/synthesis and reporting. 219

Develop a data management plan that identifies tasks for managing implementation monitoring data. 221

LEAP Case Illustration 223

Review examples of selected data management plans. 228

Faith, Activity, and Nutrition (FAN) 228
Study of Health and Physical Activity in Preschool Environments (SHAPES) 229
Out-of-School Programs (OST) 229

▶ Your Turn: Resource Priorities 237
▶ Key Points on Collecting and Managing Implementation Data 238

Phase V. Analysis/Synthesis, Reporting, and Use 239

Step 11. Analyze and Synthesize Implementation Monitoring Data 241

Conduct analysis/synthesis of implementation data. 241

Understand LEAP implementation analysis. 243

1. Tool/Instrument/Data Source Level 243
   - A. Average or summarize multiple items from a single data collection tool/data source that were used to assess implementation at one point in time, as applicable. 243
   - B. Average or summarize multiple items, means, or sums from a single data collection/data source that were used at multiple points in time, as applicable. 245
   - C. Organize information into tables by organization, essential or core elements, and data sources/collection tools. 245
   - D. Apply criteria for evidence of implementation at the data source/data collection tool level. 248
2. Essential Element Level 248
   - E. Apply criteria considering multiple data sources to determine implementation at the essential element level (i.e., triangulate multiple instruments/data sources). 248
3. Component Level 248
   - F. Apply criteria considering multiple elements of the program, policy, or practice to determine implementation at the component level. 248
4. Program, Policy, or Practice Level 251
   - G. Apply criteria considering multiple components of the program, policy, or practice to determine overall implementation. 251

Understand ENRICH implementation analysis. 251

Do not copy, post, or distribute

1. Tool/Instrument/Data Source Level 251
A. Average or summarize multiple items from a single data collection tool/data source that were used to assess implementation at one point in time, as applicable. 251
B. Average or summarize multiple items, means, or sums from a single data collection tool/data source that were used at multiple points in time, as applicable. 251
C. Organize information into tables by organization, essential or core element, and data sources/collection tools. 253
D. Apply criteria for evidence of implementation at the data source/data collection tool level. 254
2. Essential Element Level 255
E. Apply criteria considering multiple data sources to determine implementation at the essential element level (i.e., triangulate multiple instruments/data sources). 255
3. Component Level 255
F. Apply criteria considering multiple elements of the program, policy, or practice to determine overall implementation. 255
4. Program, Policy, or Practice Level 255
G. Apply criteria considering multiple components of the program, policy, or practice to determine overall implementation. 255
▶ Your Turn: Are All Data Sources Created Equal? 257
▶ Key Points for Analyzing and Synthesizing Implementation Monitoring Data 258

Step 12. Report and Use Implementation Data 261

Understand reporting from a stakeholder perspective. 261
1. Identify the audience(s) to whom you are reporting. 261
2. Define the purpose of the communication. 262
3. Determine how the information will be communicated. 262
4. Clearly articulate the results and recommendations in language that is appropriate to the audience. 264
5. Make the report, handout, presentation, or other form of communicated material visually appealing and appropriate to the audience. 265
Visual Appearance 266
Organization of the Report 267
Language 267

List and describe the summative uses of implementation data. 269

Develop a plan for reporting and using implementation data for the project and for stakeholders. 271
▶ Key Points for Reporting and Using Implementation Monitoring Data 296

Future Directions 299

Current State of Implementation Monitoring 299

Future Directions for Research and Practice in Implementation Monitoring 301

Expand innovation conceptualization and planning. 301

Apply broader conceptualization of intervention in complex settings. 303

Fully integrate work with change agents and stakeholders in innovation planning, implementation planning, and implementation. 304

Use and integrate quantitative and qualitative methods. 305

Move beyond assessing level of implementation. 305

Options for Moving Forward 306

Glossary 307
